Precipitation probability							
<05%	<05%	10%	50%	90%	90%	70%	30%

Forecast for Wednesday 30 Sep 2020

Weather: Dry overnight with clear spells and increasing southerly winds. Cloud building into the morning with outbreaks of occasionally heavy rain as well as brisk winds continuing through the afternoon. Becoming mainly dry through the evening with southwesterly winds moderating, though a few showers or drizzle could still affect the park at times.

Chance of cloud free mountain/hill tops above 600m: Greater than 90% overnight, but falling to 20% during the morning and through the afternoon as blanket cloud down to 400m spreads in. 40% during the evening but low cloud clinging to southern and western upslopes, mainly above 400m.

Visibility: Good or very good overnight and very early morning with hills into the middle distance easily discernible. Views of nearby landmarks and hills becoming significantly restricted through the morning, afternoon and into the early evening in any heavy rain and low cloud on modest hills and summits. Otherwise, adjacent hills at lower altitudes should be readily visible. Poor visibilities becoming limited to cloud covered hill tops during the evening.

14:00 on Tue 29 Sep 2020	0.4mm	0.6mm	0.6mm

Forecast for Thursday 01 Oct 2020

Weather: Some overnight showers or drizzle on hills with patchy cloud. Sunny spells developing through the morning, continuing into the afternoon with the small chance heavy showers. Showers easing by the evening with good clear spells expected.

Maximum wind: West to southwesterly 20mph, gusting 25-30mph.

Chance of cloud free mountain/hill tops above 600m: 40% overnight with low cloud clinging to southern and western upslopes, mainly above 400m. Becoming 100% by mid-late morning and through much of the remainder of the day, though lowering to 70% by late evening.

Visibility: Good visibility overnight in valleys with low-lying landmarks easily visible. Very limited views on hills with low cloud covering summits. Nearby and distant ranges becoming clearly defined through the day and during much of the evening, though poor or very poor with any late cloud that develops on hills.

Temperature: **Valleys:** Plus 6 degrees increasing to Plus 11 degrees Celsius by day.
At 600m: Plus 4 degrees Celsius.
Freezing level: Above the summits throughout.
